

ANURADHA PARAG KALKAR

Aspiring Data Scientist

+91 9284469995 | kalkaranuradha25@gmail.com | [linkedin.com/in/anuradha-kalkar-408b02290](https://www.linkedin.com/in/anuradha-kalkar-408b02290)

PROFESSIONAL SUMMARY

Aspiring Data Scientist with hands-on experience in Machine Learning, Deep Learning and Reinforcement Learning working on predictive modeling, statistical analysis, and workflow automation. Built and validated a machine learning-based engine prognostics solution to support early failure detection, and payroll tracking work automation.. Skilled at moving from data preparation through model evaluation to deployment-ready solutions.

SKILLS

Languages & Querying: Python, SQL, Java, Tableau, React,

ML / DL & Analytics: PyTorch, Scikit-learn, ML/DL libraries, Reinforcement Learning, NLP, Statistical Analysis

Big Data & Graph DBs: Apache Spark, Databricks, Neo4j

Languages: English, Japanese - N5 proficiency (JLPT N5 Certification)

EXPERIENCE

Data Science Intern

Jun 2025 – Dec 2025

Cummins India Inc. - Global AI and Analytics team

- Reduced false failure claims by 18-20% by designing and validating a layered machine learning prognostics system for engine units, enabling earlier failure detection across 1 Lakh engine monitored assets.
- Improved failure-prediction accuracy to 80% by running exploratory data analysis and statistical hypothesis testing on high-volume engine sensor data, translating raw telemetry into deployment-ready model features.
- Cut manual payroll processing time from 15 days to under a few hours by architecting and deploying a production-ready desktop application with a React front end and MySQL backend, automating shift-based payroll for more than 1000 employees.
- Built and maintained a scalable data pipeline across Neo4j knowledge graphs and Spark, structuring 10 million engine records to support real-time inference and cross-functional reporting for the Global AI and Analytics team.

PROJECTS

AI-Based Energy Consumption Prediction – Allianz Global Tech Championship

December 2023

- Won 1st place among competing teams across India and secured a EUR 5,000 scholarship by building a machine learning and deep learning forecasting model for household energy consumption
- Projected reduction in household energy usage by 40% by engineering a prediction pipeline in Databricks and translating model outputs into actionable consumption recommendations
- Tech Stack: Machine Learning, Deep Learning, MySQL, Data Analysis, EDA, Databricks

Chess AI Game

- Achieved an 80% win rate against intermediate-level players by developing a human-vs-AI chess game powered by reinforcement learning and pathfinding-based move selection
- Built a full-stack interactive game environment using React, JavaScript, and MySQL to support real-time gameplay and move logging between two concurrent players.
- Tech Stack: React, JavaScript, MySQL, AI, Reinforcement Learning

Legal Document Summarizer

- Cut manual legal document review time by 10–12 days by co-designing an NLP pipeline that combined text vectorization, topic modeling, and automatic summarization for contracts and NDAs
- Validated summarization accuracy across 50 real contract and NDA documents by benchmarking model outputs against manually reviewed baselines, confirming the pipeline's reliability for legal use cases
- Tech Stack: HTML, CSS, JavaScript, Python, NLP, Topic Modeling, Summarization

EDUCATION

B.Tech, Information Technology

2022-2026

Cummins College of Engineering, Pune | GPA: **7.91/10**

XII

2020 - 2022

Loyola Junior College, Pune | Percentage : **73%**

X

May 2020

Bharatiya Vidya Bhavan, Pune | Percentage : **94.5%**

POSITION OF RESPONSIBILITY

National Education Policy College Ambassador, Cummins College of Engineering

Sep 2024 – Sep 2026

- Represented the college as 1 of the 3 NEP student ambassadors of my college, running outreach sessions encouraging school girls to pursue tech.

Assistant Treasurer, Student Committee, Cummins College of Engineering

Aug 2024 – Aug 2025

- Managed an INR 10Lakh+ budget for student committee operations, maintaining accurate records across 23 intercollege events.

Event Management Head, Cybersecurity Club, Cummins College of Engineering

Sep 2024 – Sep 2025

- Planned and conducted cybersecurity awareness club events and workshops, growing active membership by 25%.

CERTIFICATIONS AND ACHIEVEMENTS

- Amazon AWS AI & ML Scholarship Program mentee 2024
- Winner, Allianz Global Tech Championship 2023 – among only 10 winners in India ; awarded a EUR 5,000 scholarship.
- Mentee, DELL ASPIRE Traineeship Program for Women, 2025 – selected from 120 applicants.
- Delegate, Harvard Project for Asia and International Relations (HPAIR), University of Tokyo, 2025 – represented India among 100+ of global delegates and entrepreneurs.
